I've tried using the other CD-ripper software that comes with the DVD drive, but that doesn't work either. I have Windows XP on my computer and Java on my OS, if that makes any difference . Not Applicable Not Applicable Not Applicable This invention relates to a fluid metering or control valve of the type in which a flow through a restrictor is metered by a valve member, such as a valve plate, spool or ball, positioned against a surface of the fluid under control pressure at a location such that the flow is increased or decreased accordingly. This invention is an improvement over a metering valve disclosed in U.S. Pat. No. 5,845,309, issued Oct. 8, 1998 to the applicant, wherein the metering valve is used to control flow through a metering loop, and is commonly referred to as a xe2x80x9cfluid metering valve.xe2x80x9d Metering valves are used to meter the flow of various fluids. In particular, metering valves have become useful in the hydraulic system of an integrated circuit board assembly that carries a chip, referred to as an xe2x80x9cactive chip.xe2x80x9d The active chip is typically received in a xe2x80x9cchip packagexe2x80x9d that is mounted onto the integrated circuit board assembly. The active chip generates heat during operation of the active chip, and the flow of fluid passing through the metering valve cools the active chip. Conventional metering valves typically comprise a cylindrical casing having a bore for receiving the fluid to be controlled. A valve member, such as a spool or valve plate, is received within the casing, and the surface of the valve member is pressed against a surface within the bore and against the fluid to be controlled by fluid under control pressure to control flow of the fluid. When using such metering valves for cooling the active chip of the integrated circuit board assembly, the flow of the cooling fluid is controlled by the metering valve, and the cooling fluid then flows through the bore and the valve member and through a flow passage 3da54e8ca3
