Ever wondered how you can capture a live sound in the studio? A lot of people aren't aware that you can actually do this while mixing and you can use the microphone input of your computer to accomplish this. And you don't need a separate microphone which you need to connect to your computer and let it run away, what you need is

something called a audio interface. And there are a lot of different types of audio interfaces that you can use. And today I'll be demonstrating a new audio interface that I just purchased and I'll be using that to demo how you can achieve this. So let's just get started and let's just give it a try.

This is our system that I

“Free DJ Studio” is a software that enables you to combine the audio tracks and to create mixing session live. Program Features: 1) There is no need to install additional audio drivers or codecs. 2) You have the possibility to connect several audio tracks and mix multiple sources. 3) The program offers great flexibility in

the way you want to arrange the levels. You can choose from various crossfades, volume curves, equalizers and effects. 4) All controls are visible and available in the context menu. 5) The application is intuitive and user friendly. 6) In the integrated mixer you can modify the pitch and BPM of the tracks. 7) You can lock the BPM of the tracks for better coordination. 8) For

extended functions you can drag the song lists and filter by "BPM" and by "Artist" in the list view. 9) You can share the mastered music with friends. 10) If your computer has two sound cards, you can combine them. 11) "Free DJ Studio" is lightweight and does not use too much of the computer's resources. 12) The application can be both a standalone and a plug-in. More

Info: Unique Features: 1) Among other features, “Free DJ Studio” provides you with the possibility to save the sound settings of any track, which are then used as defaults in “Free DJ Studio”. 2) Due to a built-in sound analyzer, you will be able to find out which track is playing a little bit faster than the rest of the material. 3) Even better than the others, “Free DJ Studio” provides you with an

equalizer, featuring presets. 4)
The application is compatible
with all the versions of Windows.
Unique Functions: 1) The built-in
mixer is a step-sequencer that
allows to control all faders and
effects. 2) The program is
compatible with both iTunes and
Winamp playlist formats.
Languages: - English - German
