---

June 22, 2017 – Twenty years later, Radiohead are revisiting their 1997 masterpiece with a deluxe reissue. Bonus material includes familiar b-sides and a few. The album consists mostly of orchestral versions of Radiohead songs, including "A Diamond Ring", "Fake Plastic Trees", "The National Anthem" (aka "The National" if you haven't guessed by now). It also includes some new, unreleased tracks. Earlier this month, we were delighted to discover that Radiohead had updated the cover art for their 1999 album. Now, however, we are happy to announce once again that the band has released a repackaged "Kid A" with additional material. What's in it?
