the ironwolf 4tb also supports both hardware and software encryption, allowing you to create your own personal "file vault" to protect your data and boost its security. this is especially important if your pc is connected to the internet or if youre exchanging data with others. the ironwolf 4tb allows you to create a personal file vaults, which is different from virtualization. the drive supports 512e, 512p, advanced boost and s.m.a.r.t. technologies. because it features heads on a rotating actuator, it can handle up to 16tb of raw capacity. raid 0 and raid 5 are available, but i wouldnt recommend using them on this drive, because the smart monitoring feature will alert you when the drive is failing. i would also recommend the ironwolf vr 4tb to anyone who faces extensive read/write requirements, and i would also suggest the ironwolf vr 4tb to anyone looking to create a safe backup to your computer, for it has the ability to encrypt your data and store it within two separate chunks to prevent theft. thats the obvious reason to upgrade, but there are two more: if the

ironwolf pro comes as a storage option (in raid, raid-z, or just as a stand alone drive), you can test it immediately, in your nas, with full diagnostics and aftermarket firmware. experienced users will find that ironwolf is an excellent choice for both nas and servers. the drive shines when it comes to capacity, performance and features. pros: seagate ironwolf hdd delivers 247 tb/year workload rating with similar performance to other ssds, such as samsung 860 evo independent testing shows high performance compared to other hard drives, and seagate has designed the drive with less power consumption and less heat than other hard drives, leading to longer, quieter operation for nas and servers seagate ironwolf delivers high capacity for large data storage needs without sacrificing performance seagate ironwolf offers 7.5 million hours mean time before failure warranty that exceeds samsung 8-bay drive powers up in 12 seconds and automatically powers down when not in use for up to 20 hours. user can choose either 2 tb or 3 tb models ironwolf hdd also supports raid 5 and 6. if a user has a need for raid, simply connect the drive to seagates ironwolf pro model and you will be able to create a raid a feature-rich feature set makes the ironwolf easy to use in a variety of nas applications the hard drive is available in 2 tb and 3 tb capacities price with the 3 tb model is competitive 5ec8ef588b
