The 2015 version of the Visual Studio IDE supports many of the current Microsoft development frameworks, including the following: ASP.NET, ASP.NET MVC,.NET Framework, Microsoft.NET Framework 3.5, C# 4.5, and ASP.NET 4.5. As a new feature in Visual Studio 2015, you can now assign permissions to a single user during installation. The permissions granted to the user are stored in a file and are checked upon every startup. When running Visual Studio Setup Wizard , permissions can be granted to an existing local user or to a new local user. If you have existing users that need to be granted access to Visual Studio, you can use a custom configuration file to store the permissions. For more information, see Assign User Permissions During Installation . To do so, you must use the redistributable package that has the New-UniqueUserPermissionMode cmdlet . In Visual Studio 2015, you can install development environments as part of the Visual Studio installation. For example, you can install the development environment with the ASP.NET and.NET Framework versions that you need. The Visual Studio 2015 development environment now includes support for the DevExpress ASP.NET controls. To use these controls in your apps, you can now add the DevExpress ASP.NET controls to the project in the usual way. In the DevDiv/PLATFEOL/VSALP/VSTest development environment, you can use shared projects to create portable test-driven development environments. This change also provides you with an additional folder in Visual Studio Project. You can now create portable test-driven development environments with the VSTest.Common.DynamicLibrary project. To do so, you must:
